### **Pullmantur Cruises suspends operations from today at midnight until the 02d of May**

Madrid, 15th March 2020.- Pullmantur Cruises announces the suspension of its cruise operations effectively today, 15th of March 2020 at midnight. The Company expects to operate again starting the 02<sup>nd</sup> of May 2020

This decision was taken as result of the global scenario generated by the COVID-19 outbreak, and is in line with the measures activated both by the Group to which it belongs and with the recommendation given by the International Associations of Cruise lines (CLIA), international Health organization and different governments

For Pullmantur Cruises, the safety and well-being of its passengers and crew members is always its highest priority.

Right now, the Company is focused on repatriating the passengers still on board to their home cities.

In the coming days, Pullmantur Cruises will contact the customers who have contracted a cruise for this period of time, to present the different option that can be offered.

Pullmantur Cruises trusts that this measure will help contain the expansion of the COVID-19 and hopes to return to normal as soon as possible.
